PROFESSIONAL SUMMARY

Dedicated and highly motivated Data Scientist with 2+ years of relevant experience and demonstrated expertise leveraging Python, SQL, Excel, Tableau, and R with a passion for using data to drive business decisions. Contributed to critical data-driven cancer research projects at West Virginia INBRE and worked on several data science projects, currently seeking a Data Scientist internship position.

EDUCATION

Shepherd University	Jan 2022 - Dec 2024 (Expected)
<i>Master of Science in Data Analytics & Information Systems</i>	<i>Shepherdstown, WV</i>
Coursera	Jan 2023 – Mar 2023
<i>Google Data Analytics Professional Certificate</i>	<i>Online</i>
Shepherd University	Aug 2017 – Dec 2021
<i>Bachelor of Science in Computer Engineering</i>	<i>Shepherdstown, WV</i>

WORK EXPERIENCE

Shepherd University Wellness Center	Sep 2022 - Present
<i>Flex Manager</i>	<i>Shepherdstown, WV</i>
<ul style="list-style-type: none">Managing a team of 3 employees and overseeing daily facility operations such as making sure the building is ready for the day meaning that all staff are present and all equipment are cleaned and functional and services are providedEnsure efficient completion of all tasks, maximizing productivity and minimizing downtime to provide exceptional customer service to 2800 members.	
West Virginia INBRE	Jan 2019 - Jul 2021
<i>Research Assistant</i>	<i>Shepherdstown, WV</i>
<ul style="list-style-type: none">Conducted cancer research under Dr. Qing Wang's supervision to develop a better understanding of the mechanisms that drive tumor growth, leading to potential breakthroughs in cancer therapy.Analyzed tumor growth mathematically concerning cancer therapy, enabling the identification of novel therapeutic targets and optimizing treatment efficacy.Presented findings at scientific conferences to disseminate research findings and establish a reputation as a subject matter expert in cancer research.	

PROJECTS

Cancer Diagnosis Wep App (Github)	Jan 2023 – May 2023
<ul style="list-style-type: none">Developed a cancer-type detection model that uses machine learning algorithms to classify cancer as malignant or benign based on input features.Trained and optimized the model using a dataset with over 500 rows and 30 features, achieving an accuracy of 97%Built a web application using Flask to provide a user-friendly interface for making predictions.Implemented HTML and CSS to design a clean and professional-looking website for the application.Deployed the application on a local server and tested it thoroughly to ensure it was error-free and efficient.Deployed the tested application using AWS EC2.	
E-Commerce Customer Churn Prediction Model (Kaggle)	Feb 2023 – Mar 2023
<ul style="list-style-type: none">Conducted data wrangling and exploratory data analysis (EDA) on customer churn data, identifying key patterns and trends that supported the development of a comprehensive e-commerce prediction model to anticipate trends.Constructed three models, including logistic regression, decision tree, and random forest, to build robust models capable of accurately predicting customer churn using advanced statistical techniques.Achieved an accuracy score of 79.67% after comparing model performances and deciding on a logistic regression model, enabling the e-commerce company to identify and retain customers at risk of churning proactively.	
Data Visualization Dashboards (Tableau)	Jan 2023 – Mar 2023
<ul style="list-style-type: none">Built interactive Tableau dashboards to display business metrics, providing real-time access to critical performance indicators, such as sales figures, revenue growth, and customer engagement metrics.Created sales, marketing, and Covid-19 visualizations using Tableau, leveraging advanced data visualization techniques to transform complex data sets into visual representations for analysis and intuitive interpretation.Communicated insights through data storytelling to technical and non-technical audiences on Tableau public, presenting data-driven insights in a compelling and easy-to-understand manner.	

SKILLS

Technologies: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Aws,

Data Analysis: Tableau, Excel, Data Wrangling, Pivot Tables, Excel

Programming Languages: Python, R, SQL

Soft Skills: Communication, Teamwork, Problem Solving, Critical Thinking, Time Management
